Field Service and Training

Field Service

CHA Field Service will keep your CHA systems operating at peak performance. Our service technicians are well-schooled in thin film deposition system technology—and they understand and are sensitive to the issues facing device manufacturing operations.

To keep you system running its best, CHA offers:

- Service Contracts
- Scheduled Preventative Maintenance programs
- As-needed service calls
- Operational Training for operators at your site
- Retrofits
- Upgrades of your existing CHA systems
- Documentation
- Survey system to recommend maintenance, components required, and recommended spare parts.

Did you know? In addition to daily, weekly and monthly service checks, every 6 months you should:

- Rebuild offset drive; replace bearings and o-rings
 - Rebuild Hi-Vac Actuator
 - Replace o-rings in right angle turret drive feedthru Check and tighten chamber feedthru blanks
 - Check and tighten electrical connections
 - Check Cryo-pump Compressor pressures
-

CHA maintains a large inventory of spare parts and rebuild kits for all of the CHA components in your system like the High Vac valve, Offset Drive, and all of the individual bearings o-ring and J-Gaskets.

CHA Industries' training combines a comprehensive curriculum of "hands on" experience with fundamental vacuum practices and techniques.

Training is performed at CHA's facility in the "Silicon Valley". You will work on actual components used in your CHA Industries system, including our Vertical Sealing Valves, Fixturing and Offset Drive Assembly, Electron Beam Gun and our family of SR Series EB Power Supplies. Training in adjustment and setup of our Swing Sources, Feedthroughs, Shutters, etc. are also included where applicable.

Classes begin with an overview of basic vacuum practices and principles of deposition. Maintenance, setup, and adjustments of key components are the primary focus of this course. This is combined with a comprehensive Training Workbook, instructional videos and Custom Tool Kit specifically designed for making your maintenance efforts easier, faster, and safer. This Training package is an important asset for your ongoing success and efficient use of your CHA systems.
